# The President's Report

Greetings to all campers!

Hello everyone. It was somewhere in Southeast Asia that I had visited Ontario Lake Partner program website for umpteenth time to see if the 2012 phosphorus sample values have been posted and that evening they were. I scrolled down to Trout Lake-Hoskin and scanned numbers but they were quite low so I checked twice and put them on the paper. To say that I was elated when I saw the average for the lake would have been an understatement. I expected the average to be close to 6 milligrams per liter, our goal for 2013, but not 5.5! As you will see on the graph somewhere else in the Bulletin this was continuation of the downward trend in last few years. While stand-alone one year results are not significant, when the low values are part of the trend they become quite significant.

At the beginning of March we returned home hoping to enjoy some nice weather but this year was different. Cold and snowy March reminded us of 70's winters, when it was normal for ice to leave the lakes end of April or beginning of May. It is now mid-April and there is plenty of ice on the lake.

The Board of Directors had its first meeting, including all Committees, on the 6<sup>th</sup> of April. This is the meeting at which, besides routine matters, the Board reviews previous year and make firm plans for the current year. Financially we had another successful year and maintained our sound monetary position. The Auditing Committee has reviewed financial books and found everything in order. The 2013 Budget should continue to maintain this trend. All programs will continue as in the past, with at least one new fire pump location to be added on the lake. In light of changing climate and new advances in research, the Board decided to push for completion of the lake environmental study and try to get MNR to do a fishery assessment in order to get the picture of fish species and their distribution. The last assessment was done 13 years ago and another one is certainly due. On these studies the Board hopes to partner with MNR and other institutions and look for grants because we cannot bear the cost of this work. A new committee was struck to deal with new Not-for Profit incorporation Act that will require changes to our By-Law No. 1.

The TLCASD Annual Membership meeting will be held on Saturday, June 1<sup>st</sup>, at 10:00 AM at Happy Landing Lodge. By the time you read this you will have received the invitation. There is proposal to change Article 22 in order to make it easier for former members to rejoin TLCASD. Please, plan to attend and take part in important discussions.

I wish all Campers a healthy, safe and enjoyable season.

Slobodan ( Bob ) Nikolic, Interim President TLCASD

Attendance at Board Meetings in 2012: Meeting March 24 – 10 Directors and 2 Auditing Committee members; Meeting June 23 – 10 Directors; Meeting September 30 - 9 Directors, 1 Auditing Committee Member and 1 Guest.

## ENVIRONMENT—OUR LAKE OUR FUTURE

### TROUT LAKE TOTAL PHOSPHORUS $\mu\text{g/lit}$ LAST SIX YEARS

YEAR	RANGER BAY	CAMP DRIFTWOOD	PICNIC ISLAND	TURTLE ISLAND	CHURCH CAMP	HAPPY LANDING	TROUT LAKE AVERAGE
2007	6.2	5.5	5.5	5.5	6.4	6.2	5.9
2008	6.4	5.8	7.2	5.9	6.5	7.6	6.5
2009	6.2	6.5	7.5	6.9	6.5	6.2	6.6
2010	5.7	6.4	6.9	6.3	6.2	6.3	6.3
2011	5.3	5.5	5.7	5.7	6.8	7.9	6.2
2012	5.9	5.7	5.0	5.0	6.0	5.3	5.5
2013							
AVER. 2010-2012	5.6	5.9	5.9	5.7	6.3	6.5	6.0

The above table shows total phosphorus values at six sampling sites from 2007 to 2012.

The results indicate that on every sampling site total phosphorus shows a decline in last four years which is the period TLCASD launched Our Lake-Our Future Project. What is also significant is that all sites in 2012 had total phosphorus value at 6.0 or lower.

The lake average phosphorus declined from 6.6 in 2009 to 6.3 in 2010, to 6.2 in 2011 and to 5.5 last year. The results are nothing short of spectacular and it is to the credit of all Trout Lake Campers that have made an exemplary effort to minimize input of phosphorus into the water, therefore CONGRATULATIONS are in order.

However, we now need to make sure we stay below 6.0 in 2013 and think where we want to be in next five years. Perhaps, its advisable to set the goal of being at 5.5  $\mu\text{/lit}$  or below in next five years. T his would definitely exclude any possibility of having a blue-green algae bloom in our lake. Below are all Our Lake-Our Future Statements published in our Bulletin. Please, review them and try to adhere to the actions prescribed and we are confident that we will stay at 6.0  $\mu\text{g/lit}$  or lower phosphorus in 2013!

It appears that we all know what has to be done so that lake stays clean and we just have to keep doing it.

## A NOTE FROM THE EDITOR:

As you know, we held a contest to design a new cover for the Bulletin. Only two entries were received, both of very high quality. You'll see one of the entries on the cover of this issue. The other entry is below.

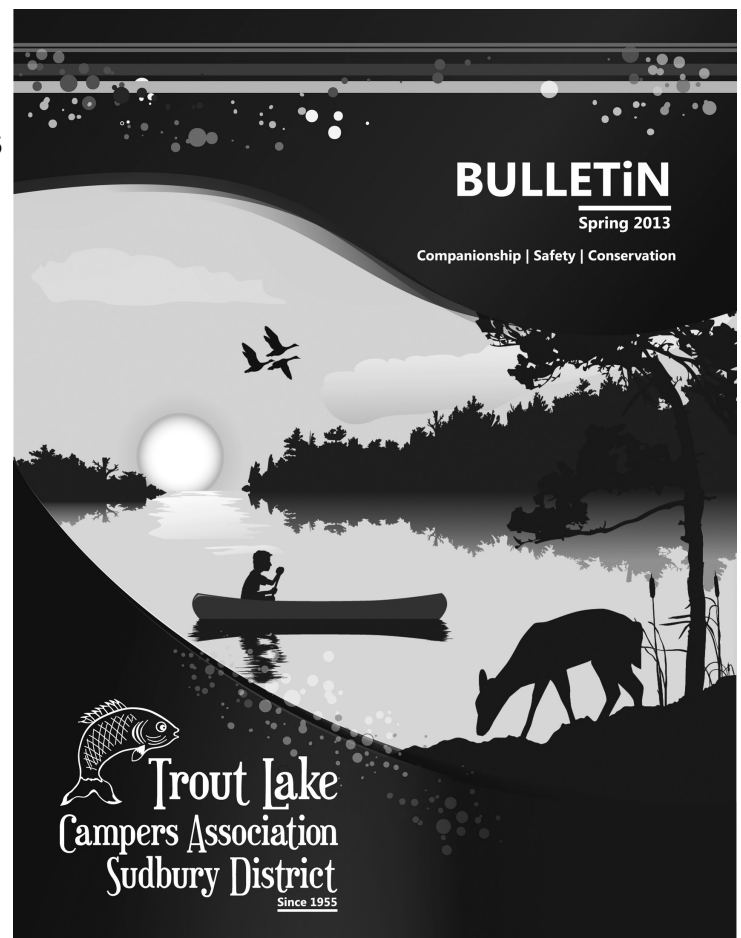

The Board of Directors have decided to select both entries as winners and use them in alternating issues. Colour versions of the covers can be seen on the TLCA Website, [www.tlca.org](http://www.tlca.org)

Congratulations to our winners, Cathy Boluk who did the front cover version, and Jamie Mayer who did the version shown below.

As always, **we welcome submissions** from our campers for the bulletin. This is your newsletter, so we like it to reflect your interests. Feel free to contact me at: [designer@cyberbeach.net](mailto:designer@cyberbeach.net) to submit photos, ideas for articles, a secret fishing spot, wildlife spotting adventures, your best BBQ recipe, etc. I'd love to hear from you!

## MEMBERSHIP COMMITTEE REPORT

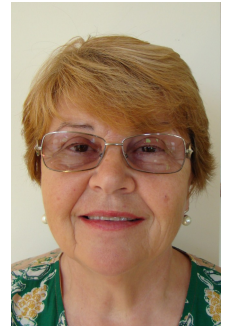

Hello, everyone. Its mid-April and there is a snow storm outside. The ice just started separating from the north shore but it may be a long time before it will be gone. Just for the record, the ice was gone around 19<sup>th</sup> of March last year! It may take quite a bit of time for campers start enjoying another summer on this beautiful lake.

Last Fall we had quite a few members that had not paid 2012 dues and upon being reminded some did pay and for two years. As it happens every year we signed new members and lost some old members, as a result we 217 members paid up, one more than in 2011 and another all-time high membership. However, we may be reaching an apex, meaning that we may not be able to continue to expect an increase in membership as in previous years. Please, note that at 2012 AGM the Membership voted to raise the dues to \$ 25, the first increase in five years.

I wish all the best to all members that have moved away from Trout Lake and welcome all new members that joined last year. I kindly ask owners who sell their property to let me know so that I can approach newcomers with membership offer. Our modest yearly dues bring an unparallel level of service to our members. Please, remember to let me know when you change your address so our Bulletin will reach you on time.

We also have few left over T-shirts for sale and will have them at Annual Membership Meeting, Picnic and Fish Fry.

Hope you have a great summer, Ljuba Nikolic, Director Membership

## So How Do You Create a Healthy Shoreline?

The easiest way, is to leave it as natural as possible. If it's too late and the natural vegetation has been altered, plant a buffer strip along the shoreline. A buffer strip provides wildlife habitat, filters runoff water, reduces soil erosion, increases biodiversity and adds value to your property. Use native plants and shrubs along this strip.

Don't remove dead tree stumps, logs and branches from the banks. Driftwood can be used in aesthetically pleasing ways as well.

Maintain your lawn naturally. Over-seed the grass to crowd out weeds. Use grass clippings, fallen leaves, compost or phosphate-free fertilizers to add nutrients to the lawn. OR remove as much manicured lawn as possible, to make way for native plants to grow. Native plants require much less maintenance and deter geese.

Plant trees and shrubs. Cattails are your friend. They help filter contaminants from the soil. The root systems of trees and shrubs hold the soil and prevent it from washing into the lake. Erosion and sedimentation can damage fish spawning areas. Do not "build" beaches where none exist. Beaches form naturally and tend to stay where they form. Attempting to create a new beach does not take into account natural water currents, which will wash away any beach sand which is deposited. If a beach is desired, you must make application to the Ministry of Natural Resources for a Work Permit. The recommended material for a beach is pea gravel. This gravel does not wash away.

Work Permits are also required if you are planning on building a retaining wall, boat launch, docks over 15 sq. meters in area, boathouses over water, and so on. In all cases, shoreline work best practices require you to install siltation control measures while the work is being undertaken. It is always advisable to do work on dry land, rather than in the water. It is illegal to try to extend your property out into the water, by placing fill beyond the natural shoreline.

The most environmentally friendly type of dock is a floating dock. Care must be taken, however, that the right building materials are used. Do not use green pressure-treated lumber if it will be in the water, as the chemicals will leach out. If you must use this type of wood, build the dock completely on shore, seal the cut ends as required, and allow the dock to "weather" for a period of time before installing it. Better choices would be western red cedar, redwood, and eastern white cedar which do not rot as quickly. Another option is using plastic wood for the deck of your dock, but it is not as structurally strong for the frame of a dock. If a floating dock isn't an option, consider a dock with pole or pipe legs. These create a very small footprint on the bottom of the lake, and do minimal damage.

Use natural cleaning products indoors and out. Baking soda & vinegar work well. Keep pet waste from washing into the lake. Maintain your vehicle so oil isn't dripping. Avoid overloading your septic system with laundry & dishwashers. Stagger loads throughout the week. Have your septic tank pumped at least every three years. When handling gasoline and oil, ensure you are far away from the lake.

Remove invasive vegetation such as purple loosestrife. See websites for best practices in removing invasives, and proper disposal methods.

More information on shoreline protection is available through the Fisheries & Oceans Canada website—look for "The Dock Primer", and "The Shore Primer". <http://www.dfo-mpo.gc.ca/regions/central/pub/index-eng.htm>.

# FISHERY REPORT

Good day fellow Trout Lakers. Signs of spring are finally here and I hope everyone is healthy and looking forward to some good times on the lake.

As the ice leaves the shore, your fisheries committee is anxiously awaiting warmer water temperatures and the conditions necessary for the Walleye spawn. Our pond was prepared last fall and is now ready for this year's fingerlings.

On Saturday April 13, 2013 a few of your committee members attended the United Walleye Club workshop held in Sudbury at the Radisson Hotel. This venue, organized and chaired by Rolly Frappier, was outstanding with each guest speaker sharing invaluable information. This workshop also gave us the opportunity to speak with some MNR staff, be introduced to new contact people, and share common interests.

In a letter from the MNR dated April 8, 2013 we learned that the community fisheries involvement program (CFWIP) which allocated funds for Fisheries in the past has now been replaced by two new programs: the Community Hatchery Program (CHP) and the Land Stewardship and Habitat Restoration Program (LSHRP)

The LSHRP will provide \$300 000 per year for Habitat Restoration and Land Stewardship projects and will be administered by the MNR. The CHP will provide \$250 000 per year to support volunteer community fish hatchery operations in Ontario. The MNR and the OFAH have entered into an agreement for OFAH to deliver the CHP on behalf of the ministry.

Simultaneously, the Ontario Federation of Anglers and Hunters (OFAH) sent us a letter informing us that they will be administering the CHP and they invited us to partner with them in this program.

Your Fisheries committee got busy gathering information and we learned that our pond operation did meet the criteria to apply for the CHP. We then responded to the letter from the OFAH, accepting their invitation and we look forward to a productive and successful relationship with their organization.

With the LSHRP deadline quickly approaching we felt it would be in our best interest to concentrate on the funding from the CHP for this year and perhaps explore other avenues in the future.

Preparations are underway to make this year's rearing successful and pleasurable for all. Your Fisheries Committee is a team of dedicated Trout Lake campers who share the same vision "Successful Fishing on Trout Lake". Each committee member welcomes the opportunity to discuss any questions or ideas you may have about the "Trout Lake Fisheries". Feel free to contact any member if you would like an update or if you have any questions about this year's operations.

## AUDIT COMMITTEE REPORT

### FOR THE SIX MONTHS ENDED DECEMBER 31, 2012

On APRIL 4, 2013, the Audit Committee (see list below) reviewed the books and records of TLCASD for the six months ended December 31, 2012. This review included the books and records and bank statements for both the lottery account and the general account. We checked that all revenue and expenses were recorded correctly including allocation to the correct category. This was done by matching the ledger, bank records, deposit slips and receipts. We also checked the bank reconciliation. At this time we found that everything was in good standing and all items were accounted for and reconciled. The TLCASD Treasurer, Dave Moxham, continues to do an excellent job of keeping the records in order. The next review will be conducted in the fall of 2013 to review the books and records for the six month period ending June 30, 2013.

## TLCA FORESTRY COMMITTEE REPORT

Submitted by: Bob Nikolic, Director, Forestry

Greetings to all Campers. While I write the “spring” report it looks like mid-February out there. We just got spoiled by mild winters for quite a few years. As far as Forestry matters are concerned, the winter has been relatively quiet. The planned Chartrand family harvest northeast and relatively far from the lake, and accessible by Lafreniere road was carried out. Forestry Committee members and other interested campers toured the operation several times. They found that the cut was done in a very responsible manner and company workers and officials were very courteous during these visits. I want to thank all volunteers that monitored this harvest on behalf of TLCASD.

Bruce Chartrand has offered a tour of company’s lumber mill to all interested campers and we will post the date in July Bulletin.

Have a great summer.

## PARTY TIME!?!?!?!?

The TLCA's 60th anniversary is approaching in 2015. Please share any ideas as to how we should commemorate this event with your Board members.

## ATTENTION BOATERS AND HUNTERS

### Safe Boating and Hunter Education / Firearms

#### Courses available on Trout Lake

and surrounding area throughout the year!  
Excellent prices for TLCA families & friends.

# *Did You Know?*

Bob Nikolic has been spying on the seagulls of Bald Rock...

She was there as soon as the top of the rock emerged from the snow.

Her partner arrived in few days and so did the rivals but she ignored them.

Finale, we will have eggs on the rocks again this year.

NOTES -- 2005 -- Revenue/Expenses higher than normal due to 50th anniversary celebrations

2011 -- Expenses higher than normal due to high expenses for Bulletin and Fishery

2012 -- Revenue - highest Revenue year due to 5 Fish Pond Grants received in 2012. (Grant for 2011, 2012, 2013)

## GREEN GUEST GUIDE

Enclosed with this newsletter is the "Green Guest Guide" reproduced with permission, for you. This is a simple tool to help educate your guests on how to treat our precious lake environment.

**The Trout Lake Campers Association Sudbury District needs YOU!**

We are **still** looking for two positions to fill on the Executive Board of Directors. We need someone to take on the Bulletin, and someone to take over as President.

Bob Nikolic our Past President, agreed to stay on as Interim President until a replacement is found. You can participate on the Board as a Director, until you have a feel for how things operate.

Want to get your feet wet? We'll help you in any of the positions, to learn what needs to be done. Call Bob to discuss it.

**Your Association needs you!**

**YARD SALE**—We're having a "we're tearing down the camp and rebuilding" yard sale, Saturday, June 29th at 510 Cherriman Road, Trout Lake, (last camp on the road, north shore opposite Silv'ry Moon Lodge.) Clearing contents, appliances, furniture, and salvage materials from the camp including windows, doors, wood, you name it—even the kitchen sink! Take Shaw Road to Cherriman Road, at the T–intersection, turn left and go to the end.

9 a.m.—4 p.m. Rain day Sunday, June 30th. Call (705) 857-3113 for more information.

**Campers are invited to submit personal items for the bulletin. A \$10 fee will apply. Submit to Linda at [designer@cyberbeach.net](mailto:designer@cyberbeach.net).**
