**The Picnic starts at  
12:00 noon,  
Sunday, August 6th  
See YOU there!**

## **NOTE FROM THE PRESIDENT—Debbie Lanktree**

Greetings fellow Trout Lakers:

After a long, wet spring it looks like summer may finally be here. The rainy weather hasn't stopped the Board from planning some summer activities to look forward to:

\* The picnic is set to take place Sunday, August 6th starting at noon at Happy Landing. There will be lots of activities for the children as well as a free hot dog and drink. We will be drawing for membership prizes throughout the afternoon and will draw for the lottery prizes at the end of the picnic. A big thank you to all who have donated prizes for the membership draw and to Luc Seguin (Seguin Hardware) for donating a barbecue for the lottery first prize and to Darryl Taylor (Taylor Sheet Metal) for donating a fire pit for third prize. Second prize is a towable tube. If you haven't bought any lottery tickets yet or want to buy more to increase your odds of winning, tickets will be available at the picnic until we sell out.

\* For the adults we will be holding a dinner/dance on Saturday, August 26th with dinner at 6:00. The band will start playing at 7:00. The plan is to hold the dance outside, under the stars. We have a back-up plan in case the weather doesn't cooperate but I'm counting on a beautiful August night. Tickets must be purchased in advance (\$25 per person) and will be available at the picnic or through any board member. Alternatively, you can contact me at my email below and I'll be sure to get some to you.

\* The first annual Trout Lake calendar (2018), featuring pictures of our lake in every month of the year, has been produced. Thank you to our judges Brenda Fraser, Serena LeBlanc and Kathy and Jamie Strutt. We had many submissions for the summer months and it was difficult to choose winners from the beautiful photos submitted. Not quite so many photos were submitted for the winter months but between Charlie Lumbis, Linda Lachance and Serena Leblanc we were able to fill the void and the collection of pictures has turned out great. The calendar will be for sale at the picnic and the dinner/dance. If you would like to purchase one and won't be at either of those events please contact me. Keep in mind that calendars make great Christmas gifts!

**Remember...to return the raffle tickets and money to the Treasurer as soon as possible. We must account for all tickets, even un-sold ones.**

**We can use any returned tickets to sell at the picnic. Thank you for cooperating and supporting the worthwhile activities of this organization.**

The annual general meeting was held on June 11th with approximately 30 people in attendance. I'd like to extend a warm welcome to our newly elected board member Jim Pettigrew. I'd also like to thank our outgoing Board member Ljuba Nikolic who served for many years on the Board. Your hard work and commitment to the Trout Lake association has been much appreciated.

Wishing everyone a great summer.

**Debbie Lanktree**  
dlanktree@hotmail.ca

If you haven't yet picked up your prize from last year's picnic, from Debbie, please do so before July 31st. Otherwise, those items unclaimed will be used this year.

## KIDS NATURE ACTIVITIES

### DIY Acorn Marble Necklace Nature Craft: Materials

You need:

Marbles

Acorn caps

Twine

Drill

Glue gun with glue sticks or E6000 Craft Adhesive.

Help the kids find acorns, remove the caps. Drill two holes and string the cord through. Glue the cap to a marble.

*Acorn Marble Necklaces*

## LEAF PRINTED

## *Rocks*

Use craft paint and paint the back of the leaves. Press onto the rocks and rub. Too much paint will ooze out of the sides of the leaves.

Allow to dry. Spray with clear acrylic if desired.

**TROUT LAKERS  
PEROGY & BOOGIE**

Your Board of Directors has organized an adult evening, social event to be held on:

**Saturday, August 26, 2017  
Happy Landing Lodge  
Dinner at 6:00 p.m. followed by  
live music & dancing (7:00—10:30 p.m.)  
Tickets \$25.00 per person**

Tickets will be available at the Picnic and from Board members. They must be purchased in advance only.

The dinner will consist of perogies, Polish sausage, salad, trimmings, tea and coffee.

Music will be provided by “Riverside,” a rock band.

Come on out and get to know or reconnect with your neighbours! Let’s see some Trout Lake spirit!

\*\*\*As Happy Landing Lodge holds a liquor licence, in order to comply with the regulations, please purchase your liquor from the lodge. Do not bring coolers to the event. Please drink and drive responsibly.

We remind boaters at the start of the busy season to always follow safe boating practices.

Wear a lifejacket.

Leave alcohol at the dock.

Every year, over 16 million Canadians take part in recreational boating, and in Ontario alone, 35 people drowned due to boating accidents in 2013. 88% of these individuals were not wearing a personal flotation device, and 40% of the accidents were related to alcohol consumption.

## ENVIRONMENT & FORESTRY REPORT— Bob Nikolic, Director

Greetings to all Trout Lake Campers and welcome to the new summer season.

It appears that the “rainy” season is over or at least abated a bit. As one of my neighbours put it, “We are getting rain forest here”. In mid-May Guy Springay and I took phosphorus water samples and because of the inclement weather conditions ,took Secchi readings only at the end of June. We will also carry out Sechi readings in mid-August and again at the end of September which will give us a good water clarity average for the season.

There will be no activities in forestry within one kilometer of the lake until past the long weekend in October.

A word about garbage on Trout Lake/Shaw Road. This Spring right after snow melt I decided to collect the garbage on the entire length of Trout Lake/Shaw Road from Cranberry Lake turn-off to Highway 535. Paul Fyfe helped to pick up garbage from one section as well. This resulted in collecting 2 full garbage bags including 31 beer cans and bottles!!! It seems that 10 cents deposit is not good enough to make people return empties. There was also a DVD player thrown away close to the Moose Lake culvert! A rough distribution of garbage was: 80% was collected from Cranberry Lake to Naraka Lake turn-off, 15% from there to Cherriman Road and 5% from Cherriman to Hwy. 535. The distribution indicates that the vast majority of garbage was disposed last Fall by outside hunters who hunted by driving between Hwy 69 and Naraka Lake. Outside hunters probably left a considerable amount of garbage on the rest of the road but some of us may be doing it as well. While I and other campers do collect the garbage, the ideal situation would be not to throw the garbage around in the first place. I would certainly like to know what makes people throw the garbage in the bush, rather than carry it out.

### **OUR LAKE – OUR FUTURE**

All of this could have been recycled!

**FERTILIZING CAMP LAWNS  
WILL HARM WATER QUALITY**

## FISHERY REPORT—Brian Smith

The Fishery committee would like to thank the dedicated and thoughtful volunteers that came to help out with our fish pond this year. Thank you for your contribution. We would also like to acknowledge Ontario Federation of Anglers and Hunters contact Matt Burley...and Ministry of Natural Resources contact Derek Luetchford.

Muskelunge

If you look closely, the loons in Musky Bay have a chick. We hope it survives the musky! We've had no successful loon rearing in a few years in this area.

## SAFETY REPORT—Darryl Taylor

Thank you to the volunteers who help with the markers and lights. A special thank you to Paul Marcon for looking after the east end of the lake. It is much appreciated Paul, and I know you have done a lot for the association in the past.

Four fire pump boxes have been replaced along the lake. They are in the same locations just bigger and brighter now. We will continue to replace the older boxes each year depending on our budget.

Please take the time to familiarize yourself with the fire pump closest to your camp. It is your responsibility to know how to operate these pumps. If you have any questions please do not hesitate to contact me.

Darryl Taylor 705-662-3834

Our new fire pump boxes—Thanks Darryl, for building these!

## Please note and following article: **What are kill cords?**

The kill cord, or 'engine safety cut-out switch' to give it its proper name, is a device used to stop the engine in the event of the helmsperson being thrown out of their seat.

It consists of a length of cord or plastic wire connected to a kill switch on the engine or dashboard of the boat.

One end of the kill cord has a plastic collar to hold the switch open, the other has a clip on it, which can be attached directly to the helmsperson's lifejacket, or made into a loop which is then passed around their wrist or thigh.

If the helmsperson is thrown from their seat by a sudden manoeuvre, such as hitting the back of a wave or a sudden loss of grip at the stern, the kill cord is pulled from the dash, cutting the engine and preventing further injury from the spinning propeller.

### *Why are kill cords in the news?*

Because of a [tragic accident](#) on 5 May 2013 in which two people died and two more were badly injured in the UK.

All six family members were thrown from their 8m RIB, which then continued to circle around them killing the father and eight-year-old daughter and badly injuring the mother and four-year-old son before it was brought under control by a local ski instructor.

Prior to publishing its report on the accident, the Marine Accident Investigation Branch (MAIB) took the unusual step of issuing a safety bulletin confirming that the boat's kill cord was not being worn at the time of the accident and recommending four courses of action:

1. Test them regularly to ensure that the engine stops when the kill cord mechanism is operated.
2. Make sure that the kill cord is in good condition.
3. Always attach the kill cord securely to the driver, ideally before the engine is started, but certainly before the boat is put in gear.
4. Stop the engine before transferring the kill cord to another driver.

# OSPREY—Top Predator!

The Osprey *Pandion haliaetus* is a large, powerful raptor, or bird of prey.

As is the case with most raptors, the female is larger than the male. She weighs on average 1.6 kg, compared with 1.4 kg for the male, and has an average wingspan of 163 cm, compared with 159 cm for the male. The adult Osprey measures anywhere from 53 to 65 cm long.

The Osprey is one of the most widely distributed birds in the world. It is found on ocean coasts and along the shorelines of large lakes and rivers on most continents and islands. Data indicates that Ospreys can live for 15 to 20 years; however, some individuals have lived much longer.

On average, the nests are 30 to 60 cm deep and 1 m in diameter, but some are more than 2.5 m across.

Some of us have been fortunate to see the birds hunting by diving into the water and surfacing with a fish between its long talons. It is a spectacular sight.

Like many other birds of prey that are high on the food chain, Ospreys throughout the world had breeding problems during the 1950s and 1960s. These problems arose mainly from the then widespread use of organochlorine pesticides, especially DDT which caused thinning of the shells of the eggs, which consequently tended to break under the weight of the female. Since the use of these products has been limited nearly everywhere, populations in areas where there is still suitable nesting habitat for the species have begun to recover.

Apparently it is the Osprey's long life expectancy that enabled it to survive through those years of heavy pollution, despite low productivity. The bird's amazing adaptability, which allows it to live near humans and to use artificial structures for nesting where there are no natural sites for its nests, reinforced by access to artificial reservoirs and ponds stocked with fish, has contributed to the recovery of the populations of Ospreys that were most strongly affected by pesticides.

Besides being a magnificent representative of North American wildlife, the Osprey acts as a biological indicator of environmental problems. And as long as people continue to act on the signals that this and other indicator species are sending out about the condition of the environment, populations of Ospreys and many other species will remain.

We are very fortunate to have Ospreys as residents of Trout Lake.

## TROUT LAKE TALES

We've had an extremely wet spring and early summer with lake levels rising 3 times to spring levels. With all of the high water, be careful driving your boat as debris such as logs may have floated off of the shoreline.

The OPP and Conservation Officers and Sudbury Regional Police have already visited the lake 3 times checking boaters cards, registrations and fishing. Remember, boats must be re-registered every 10 years now.

Photos of the osprey nest at the power lines show 2 chicks this year!

Owl's Nest Road washed out at Shaw Creek during the heavy rains in early July, most likely due to a beaver dam breaking. The nearby cottagers heard the roaring water as it tore down the creek to the lake taking trees and branches with it, as well as washing out the road culvert and two private culverts. Full sized trees were flushed out into Trout Lake. Luckily no one was injured.

Stillers have acquired a float plane. You may have seen it taking off and landing. Be cautious when a plane is approaching to land or take off. They aren't as maneuverable as your boat.

We'd like to say thank you to Bill and Carol Munro for their valued contributions to the TLCA. Bill served on the Fishery & Safety Committees and Carol on the Audit Committee for many years, in addition to many other volunteer jobs. They have sold their property and are moving on. We'll miss you!

Have you seen any unusual wildlife? Share the news! I saw a "coy-fox" on Hwy. 535. This is a cross between a coyote and a fox. It was the size of a coyote but with red and grey fur, and a fox-like tail.

Remember to contact any of our Board of Directors to see the new TLCA calendar which will be for sale starting at the picnic. It's gorgeous!

## Use of Crown Land—Update

FOCA is pleased to be able to announce that, effective June 1st, 2017, Ontario Regulation O.Reg.161/17 came into effect. The important changes now mean that a **person can occupy public lands without an MNRF permit - subject to some conditions**, and only if allowed by municipal bylaw or Federal statute - for boat lifts, boat ramps, marine railways and docks, single-storey boathouses, swim rafts, ramps, jumps and slalom courses. Link to the full decision, and get further information from FOCA, here: <https://foca.on.ca/municipal-authority-over-boathouses-decision/>

Please note that some of these are subject to municipal zoning or building bylaw, and/or federal regulation. Provincial work permits may still apply for the construction or installation of the above.

# MEMBERSHIP REPORT—Richard Lanktree

Hello Everyone;

Summer is finally here and we hope all of our Trout Lake members have plans to enjoy the lake. Membership has privileges. Members of the Association receive three Trout Lake Bulletins annually. We organize an Annual Trout Lake Campers Association picnic with games, food and prizes for the children and a dinner/dance for the adults. The Association also supports safety, fisheries, forestry, and the environment.

The collection of membership dues has been very strong the last few weeks. As of July 7th, we have collected 151 memberships with a target of 200. A “Big Thank You” to those members who have submitted their payment. An additional “Thank You” to the members who make donations above the \$25 membership.

We strive to exceed our membership target so please, if you have not yet paid your membership we ask that you do so at your earliest convenience.

Your support is not only very much appreciated, it also allows us to carry on the important work of the Association.

In addition, a reminder to all members to please notify me if your address changes so we can update our address list and ensure the Bulletin continues to reach you.

Have a great summer everyone.
