## NOTE FROM THE PRESIDENT—Linda Lachance

Hello again!

The Association held a successful Annual General Meeting on July 10th. A number of new people stepped up to fill positions on the Board and I am delighted to welcome them. You'll see the revised list of Board members on the page opposite.

I want to thank all the members of the Board from 2021 for their service and especially those who are not continuing—Jim Pettigrew, Angela Ouimet and Serena LeBlanc. Your contributions are appreciated. I also want to thank those on the Audit Committee for their years of service. As per the new Not for Profit Corporations Act, we are now obligated to have our books reviewed by an external auditor annually, so this committee will cease its work.

We are working with MNDMNRF (crazy initials!) towards rehabilitating the former fish pond property in order to cancel the lease and reduce the annual expenses. There are some structures there which have to be removed and will likely cause us some expense to do so.

The matter of sewage being dumped in the lake at the old government landing has been dealt with and MNDMNRF will be posting the area "No Camping". Hopefully this will be followed up with enforcement to prevent the issues from continuing. It is noted, however, that campers have reappeared at Judge Lake, and likely are the same ones. We will continue to press the Ministry to deal with this issue too.

We held a very successful picnic on July 31st which was well-attended, at Silvery Moon Lodge. We'd like to express our thanks to our wonderful hosts, the Stillar family. The kids had a ball participating in the races, and Santa made an exclusive appearance. We couldn't have done this without the hard work of many volunteers.

There have been some recent property sales on the lake and I would like to welcome all of the new owners, and urge you to join and participate in the Association activities. If anyone has new neighbours, be sure to tell them about our Association, going strong since 1955! There is an on-line membership form available on our website, [www.tlcsd.ca](http://www.tlcsd.ca).

Thank you to all the Board members for your commitment to this organization and your hard work on making the picnic a success.

Please note **we are still seeking a person to take on the role of Bulletin director**. I will be unable to continue much longer. You will be trained in this position. Please, please step up!

Linda (the Prez)  
Troutlakecsd@gmail.com  
(705) 857-3113

## Joel Desmarais, Director of Safety

### Happy Summer Fellow Campers

I hope everyone has been enjoying the great weather we have been having this summer. Thank you to all the volunteers who help with the markers, lights and fire pumps. Your continued efforts are greatly appreciated. If any of our members would like to volunteer to assist with markers and general lake safety in the future please do not hesitate to contact me. We are always looking for new volunteers to assist. I would also like to give a friendly reminder to everyone to take some time to review the fire pump map provided in the bulletin and familiarize yourselves with the locations of fire pumps closest to your properties. Being in the middle of an emergency is not a good time to be trying to figure out where the nearest fire pump is located. For those of you that have a fire pump station on your property please take some time to test the pump and hoses in the coming weeks to make sure they are running well and no damage to the hoses. If any pumps are not running or if parts are missing or hoses are damaged, please contact me for replacements.

This summer I have been receiving a lot of reports of irresponsible boaters on the lake putting people and wildlife at risk. There are a handful of boats which I have received numerous complaints about from different members. This is a friendly reminder to PLEASE watch your speed near shorelines and tight narrows. I have had several reports of boats passing through narrows at full speed, boats running over loons and some close calls with swimmers and kayakers nearly being struck. Please do not assume that wildlife on the lake such as loons will move out of the way of your boat in time. We have already lost a few this year to irresponsible boaters. There is NO REASON to be traveling full speed close to shore or in narrow areas of the lake. If you cannot see what is ahead of you then please slow down. High speed boat traffic should be traveling down the middle of the lake away from shorelines and away from swimmers, kayakers and pets. Ontario regulations dictate that a province-wide-shoreline speed restriction of 10 km/h within 30 meters of shore is in effect whether posted or not. These regulations can be enforced by OPP, MNR and the MTO resulting in possible fines and boater's license suspension. If any of our members witness irresponsible boaters participating in dangerous activities on the lake I would encourage you to write down the boat registration number (if you can see it) and call the local police to submit a complaint as our campers association has limited authority to do anything about these dangerous habits.

Should anyone have safety concerns or would like to report lost/damaged markers and other safety equipment please do not hesitate to contact me. I hope everyone enjoys the rest of their summer take advantage of the great weather we are having late in the season because before you know it the snow will be flying. For those of you who enjoy our lake year round see you out on the ice! If you spot a black snowmobile towing a blue ice hut don't hesitate to stop and say hi. I might even be kind enough to share some of my secrets for those trophy fish!

## People Polluting Trout Lake

I've received an appalling report about people disrespecting the environment around Trout Lake.

Apparently a group of people have been using the old government landing site on the north shore as a free campground. There have been ongoing issues with them building fire pits in the roadway, blocking the ramp, leaving garbage strewn about and causing havoc.

The latest report is that someone dumped their sewage directly into Trout Lake. The issue has been brought forward to Ministry of Northern Development, Mines and Natural Resources. The Ministry has decided to post "No Camping" signs.

If anyone has any information about this matter, including names of the campers there, license plates, photos, please come forward and share the information.

If partying is an issue there, report it to the OPP. We need to act in unison to make it very uncomfortable for people to remain there, who are disrespecting Trout Lake.

In addition, we all should know that it is illegal under the Public Lands Act to camp at access points.

---

On a separate matter, on June 27th, I received a report of a dead moose floating in the lake along the north shore west of the power lines in a bay where there is a beaver lodge. This issue was also reported to MNR and they opted to take no action, saying they prefer to "let nature take its course". This does nothing to ensure the safety of the water supply for those who draw from the lake, nor prevent someone from running into it with a boat. The stench is horrible and the environmental effects...I haven't heard lately, but I imagine it is gone, sunk, eaten...

### Good News!

Congratulations to Joan and Bob Houston who recently celebrated their 50th Wedding Anniversary.

Congratulations to the Gravelle family who have sold Harris Movers and are now officially retired. They are enjoying life on Manitoulin Island.

# FISHERY—Deven Stillar

Trout Lakers!

Another summer has come & gone. When you're reading this, the colours on the trees will be changing and fall will be here.

As always, it's been another great year on Trout Lake. We received 15,000 fingerlings from the MNR this year, and we're very pleased to say that after a long road of discussions, we've been added to the MNR stocking list and will receive fingerlings every second year going forward. These new stocking efforts coupled with catch and release practices on the lake will help ensure a healthy and vibrant fishery system.

We'd like to thank Derrick Luetchford from the MNR for his help on this and especially his patience while we worked to get Trout Lake added to the list.

Wishing everyone a beautiful fall, and a mild winter!

Your friends from,

The Fishery Department.

## ENVIRONMENT & FORESTRY

Miranda Virtanen

With the summer in full swing, I was thrilled to start lake monitoring programs and help gain a better understanding about the lake's health and ecosystem.

My family camp on Trout Lake has always been a special place for me growing up; full of wonderful memories and a place where I could get away and recharge. Throughout my time observing, exploring and enjoying the lake, I have formed connections to the land,

water and the wildlife that call it home. These connections, appreciation and love for Trout Lake are the reasons I help to protect the lake. I'm honoured to share my passion for nature and offer my skillset in environmental biology for Trout Lake.

### Ongoing and New Lake Monitoring Programs

The Trout Lake Camper's Association has been participating in FOCA's Lake Partner Program since 1992. The goal of the Lake Partner Program is to "better understand and protect the quality of Ontario's inland lakes by involving citizens in a volunteer-based water quality monitoring program". Water samples are taken every spring and water clarity measurements are completed in the spring, summer and occasionally in the early fall. Results are shared on FOCA's website (<https://foca.on.ca/lake-partner-program-sampling-assistance/>). Stay tuned for results from 2021.

This summer the TLCA participated in NEW community science programs to help collect additional data on lake health. Volunteers across Trout Lake, and Canada, took part in Living Lakes Canada's National Lake Blitz program to collect community science data for a 'snapshot' of Canadian freshwater lakes; looking at temperature, water colour, shoreline health, plants, wildlife and invasive species. The program encourages the widespread monitoring of lakes across Canada using simple tools so participants can easily understand the impacts of climate change on freshwater lakes.

We also collected plankton and eDNA samples as part of the IsampleON Program by the Invasive Species Centre and FOCA. This program helps to detect the presence of aquatic invasive species in lakes and fill data gaps to manage the spread of invaders. Results from the program will be posted on <https://FOCA.on.ca/isampleon/>.

### Stop the spread of invasive species, new Ontario regulations for watercrafts

"Many ecological, economical, and recreational impacts have been observed in North America due to the introduction of invasive species. The importance of preventing the spread of these species cannot be stressed enough. The active participation of boaters, anglers, shoreline property owners and other recreational water users is vital to prevent the spread of these invaders. Our efforts today will benefit the aquatic ecosystems of tomorrow as well as contribute to our continued enjoyment of the benefits it provides." (IsampleON Program)

Watercrafts are a major carrier of invasive species, and Ontario's new regulations allow us to better prevent and slow their spread using **Clean, Drain, Dry** practices.

- Boaters are now required to remove drain plugs, drain all on board water and remove any aquatic plants upon removing the watercraft from a waterbody.
- Prior to reaching a launch site for a body of water, the watercraft, watercraft equipment and any vehicle or trailer used to transport the watercraft or watercraft equipment must not have an aquatic plant, animal or algae attached to it. Note: watercraft includes any motorboat, rowboat, canoe, punt, sailboat, or raft.

For more information, including webinar recordings and best management practices, visit FOCA's website. If you identify any invading species near your cottage, call the Invading Species hotline at 1-800-563-7711 or visit Ontario's Invading Species Awareness Program website.

### Species at risk bats live on Trout Lake

Did you know that Trout Lake is home to various species at risk? One of these species includes an endangered bat known as the Little Brown Bat. Bats in Canada are strictly insectivores and play a large role in controlling insect populations. On average 1 bat can eat 600 insects in an hour. In Ontario, there are 8 species of bats and 3 are listed as "endangered" species which means they are at risk of becoming extinct. This is mainly due to habitat loss and the spread of a fungus that causes White-Nose Syndrome which can cause populations to decline by 90-100%. One way to help conserve bats is to report sightings to the Neighbourhood Bat Watch <https://batwatch.ca>.

### Notice of Inspection of Approved Aerial Herbicide Project Plan Sudbury Forest

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry have provided notice to inspect the approved aerial herbicide project for Sudbury Forest. Selected stands on the Sudbury Forest will be sprayed with herbicide to control competing vegetation, starting on or about August 15, 2022. **This includes a stand on the north east end of Trout Lake along Lafreniere Road.** Information can be obtained electronically on the Natural Resources Information Portal <https://nrip.mnr.gov.on.ca/s/fmp-online>.

## **What Does Your Trout Lake Campers Association Do?**

We have one of the oldest and most active campers' Associations in Ontario (since 1955!). We notice more members are making donations when they renew, and we truly appreciate that. What do we do with your membership and donations?

### **Safety:**

- Installation and maintenance of the safety markers around the lake
- 12 fire pumps available for use in the event of a fire
- education around safe boating rules; courtesy

### **Environment:**

- water quality testing and monitoring - participation in Ontario Lake Water Quality Program
- education around protection of our lake and forest resources; plants and animal species; invasive species

### **Forestry:**

- consultation with Ministry when Forest Management Plans are being developed; negotiation when required; monitoring of forestry activities

### **Fishery:**

- liaise with Ministry of Northern Development, Mines, Forestry regarding fish stocking programs
- education regarding sustainable fishing practices, species, techniques

### **Communication:**

- 3 issues of the Bulletin newsletter mailed out to members
- Facebook page for current news, website & back issues of the Bulletin
- Annual General Meeting

### **Advocacy:**

- representation of our members on issues of garbage, taxation, development, local issues, etc.

### **Social:**

- annual Picnic, a free event for all of our members
- other activities occur periodically

### **Administration & Finance:**

- administering the organizations' records, financial records, insurance (liability for board members and volunteers), membership in FOCA, Meetings of the Board of Directors; minutes, agendas
- correspondence, emails, telephone calls, liaison with government, organizations, groups, etc.
- keeping accurate financial records, reporting to the Board and members, lottery licensing and reporting
- By-laws and policies, procedures, legal compliance, arranging audits

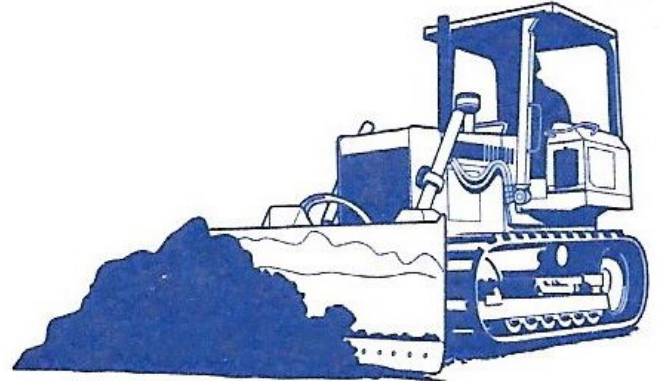

At the 2022 Annual Meeting, members voted to increase membership dues for next year to \$40 per year. This is in recognition of the value of the membership and the increased costs for everything we do.

# MEMBERSHIP REPORT—Debbie Lanktree

Hello Trout Lake Campers:

Thank you to all those who have renewed their membership for 2022. Our membership count as of mid August is 184. We signed up a number of new members at the Picnic earlier this month and I would like to welcome them all to the Association.

Reminder to please let me know if your contact information changes so that you continue to receive our communications.

Hope everyone enjoys the rest of the summer!

Membership renewal letters were sent out in May. Dues remain at \$25. We ask that you please pay by June 30<sup>th</sup>.

This year there are two options to pay:

E-transfer to [tlcabank@gmail.com](mailto:tlcabank@gmail.com) (please be sure to include your name, email, mailing and Trout Lake address in the comments section).

Or mail cheque to:

Treasurer, Trout Lake Campers Association  
P.O. Box 315  
Noelville, ON  
POM 2N0

Questions regarding payment can be sent to Dave Moxham, Treasurer at

[davemoxham@live.com](mailto:davemoxham@live.com).

Please encourage any new owners on the lake to join the Association. If there have been changes to your contact information please let me know so you continue to receive communications and bulletins.

Thank you for your support.

**THE DIRTY DOZEN FOR SEPTIC SYSTEMS**

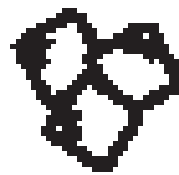

These twelve products & chemicals can have negative effects on septic systems & should be strictly *limited in use*, or even *eliminated*:

 <b>Liquid Fabric Softeners.</b> Fabric softeners coat clothes with slimy chemicals that are harmful to your septic system	 <b>Bath &amp; Body Oils.</b> Avoid using oily lotions & personal care products with micro plastics (micro beads)
 <b>Drain Cleaners.</b> Toxic drain cleaners can affect healthy bacteria activity & impact the ability to properly treat wastewater	 <b>Toilet Cleaners.</b> Most products contain harsh cleansers that can cause long term problems with continual use
 <b>Spray Shower Cleaners.</b> The sanitizing & emulsifying features of these products are very harmful to septic systems	 <b>Degreasers.</b> Degreasers contain dangerous carcinogens that flow through your septic tank & into the soil
 <b>Quaternary Ammonia.</b> Known as "quats", these complex organic salt compounds are found in many products like disinfectants, surfactants & fabric softeners	 <b>Prescription &amp; OTC Drugs.</b> Never flush drugs & antibiotics down the drain - they can kill healthy microbes in the system & cause increased maintenance
 <b>Antibacterial Products.</b> These chemicals kill bacteria & microbes but are <b>NO MORE</b> effective at deactivating viruses than any other soap or detergent	 <b>Powdered Detergents.</b> Dry detergents may have fillers, sealants or extenders that can clog your dispersal field
 <b>Surfactants.</b> Found in almost every detergent, soap & cleanser, surfactants lead to faster solids buildup & the degradation of soil	 <b>Construction Debris.</b> Paint, chemicals, gasoline, oil, pesticides & antifreeze can stress or destroy the biological treatment in your system

## Heating and Cooling Your Cottage Can Leave You Questioning

- I'd like a heating system to extend my camping season but what is the best option?
- Do I have enough space for a furnace and duct system?
- Do I have enough capacity in my electrical panel for a new Air-Conditioner?
- I don't want to bother with propane or costly baseboard heaters. What are my options?

Our group of industry experts will work with you to find the best solution to fit your budget.

## Cottage Heating and Cooling Services

- Ultra high-efficiency ductless or central air heat pump system installations capable of operation down to -30 degrees Celsius (No propane needed)
- Baseboard heating conversions
- Propane furnaces, wall mounted units, space heaters and garage unit heaters
- On demand hot water systems or hot water tank installations and replacements

Turn to the experts

# WINE TIMES

volume 1

By Lise Gagne

Welcome to a 12 volume introduction into wine. The intent is to provide basic information to allow you to explore the Wide World of Wine (WWW). I have had the opportunity to invest into some formal training with the Wine and Spirit Education Trust (WSET) and it has allowed me to broaden my love of wine beyond just drinking Cab! I absolutely love watching people explore wine and food pairings. The world of wine can be overwhelming, seem intimidating and snobby but it doesn't need to be that way! Let's start exploring! Volume 1 is a simple little primer to get us going!

## How do you "TASTE" wine?

4 Steps (yes you can do it vs quaffing wine J)

Appearance

Palate

Nose

Finish

### The 6 S's! Yes, it's SIMPLE

See

Swirl

Sniff

Sip

Swish

Savor

From my experience leading tasting groups most people don't really care about the Appearance but the taste is important. Surprisingly the most important part is the smell, are you surprised? Well I was so now I take the time to swirl and sniff all my wine to better understand what I like and what I don't like. That guided me to understanding the tags at the LCBO, for example Cassis as a characteristic sounded jazzy but I discovered I don't actually like wines with that characteristic. We can dive into characteristics and Wine Traits in the next volumes but for now let's stick to the basics and a few other simple things you can do to help develop your sense of smell and internal systems to grasp primary aromas and flavors and lock them into your brain!

### Sniffing "Smelling" basics

In the WWW hundreds of aromas exist! We just don't really pay attention to them, understanding what these aromas are and "locking" them into our brains is a very helpful strategy for understanding what aromas we like and what we don't like. All this makes buying wine SO MUCH EASIER!

Have the right glass! Your granny's glass is not going to help you here! Drinking from a water cup or snifter is not the right choice! Sorry I said wine was not snobby! Seriously though having a good glass is really important. You do not need to spend a fortune on wine glasses here either. I always recommend getting the Riedel Magnum Overture glasses. They are a universal glass that can be used for any wine and if you have gone to any wineries they are often used. They have a shorter stem too that helps prevent tipping or breaking. You can buy them online or locally at Popes and they are available in multiple unit packs that I highly recommend. Why is this important? A good glass allows the aromas to come out vs get "knocked back" down into the glass from a bulky inner ridge. There have been many studies conducted to demonstrate the effectiveness of a well-designed glass but the main conclusions have shown that a glass with a large bowl and enough room in the glass to allow oxygen contact to enhance the aroma of the wine. Many wine specific glasses exist and I have a massive amount of them but in general I keep going back to the ones I recommended with the intent of having a universal great glass. It gets really fun to do parallel tastings in the same glass too!!

### Smelling tips

Take a quick sniff to prime up those senses. Position your nose above the glass to start and move into the glass until you pick up individual smells

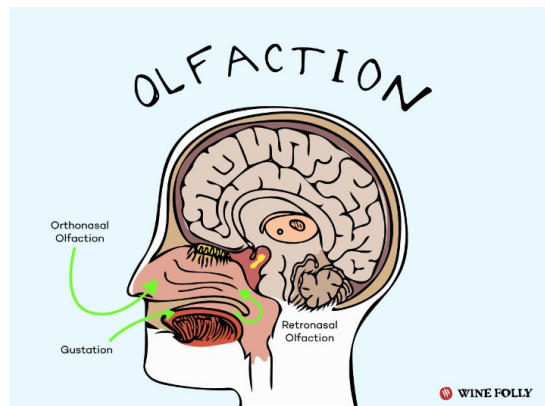

Swirl the wine, the best way is to swirl it on a solid surface to avoid splashing

Take some delicate sniffs and take time to pause and think, repeat. See point 1 for nose position

Start with identifying fruit smells also known as Primary Aromas.

## Tasting Basics

Flavors are detected (perception of flavor) by Retronasal Action. Now we are on the Geek Street! Tasting has a lot to do with smelling, YEP! Smelling wine is the most important part of tasting wine. WHY?? Orthonasal and Retronasal Olfaction! Let's dig deeper into this, hey it might make you want to go back to quaffing wine but I will risk it! I love the image taken from Wine Folly (one of my go to simple resources, see resource list at the end).

Orthonasal – external sense when you put your nose in the glass  
Retronasal – internal sense, inside the mouth commonly known as reverse smell

Cool uh! How do I do it?

This process is somewhat like chewing the wine. I call it wine yoga breathing HAHA!

Take a medium size sip of wine

Swish it in your mouth so the wine touches all the nooks in the mouth

Swallow or spit it out

Take a slow breath through the mouth and then exhale through the nose

Here are a few of my summer favorites to work with:

Thirty Bench Winemaker's Blend Riesling on sale right now for \$19.95

Tawse Growers Blend Pinot Noir \$29.95

Babich Sauvignon Blanc \$18.05

Featherstone Rosé 15.95

Take Note – one of the annual TLCA Picnic Lotto Prizes will be a wine prize worth \$200 curated by me, it's going to be a prize of mixed wines to explore the non-typical offerings with the intent to allow someone to try new wines. Don't miss out and purchase your tickets now!

Also one more thing – put this book on your Santa list – it's a simple user friendly book I recommend to everyone who is interested in wine. **Wine Folly The Master Guide by Madeline Puckette and Justin Hammack**. The online resources by Wine Folly are also extremely entertaining and useful!

Let's conclude here! It's summer so go get busy! Try something new or work with your current wines and take a look at your glasses! Let's Get RETRO (nasal)!

## Views from the Outhouse

A morning trip out to the loo  
can yield a fascinating view.  
My policy is open door  
so I can see the woods and shore.  
A kingfisher flew by today  
with tilt of wings and flash of grey.  
A spider's web was rimmed with dew,  
the grass, all silver, shimmered too.  
A chipmunk scampered nimbly by  
then paused to scold me, tail held high.  
His case was fair, my crimes laid bare,  
I could not argue, sitting there —  
we had usurped his habitat,  
and I apologized for that.

When I looked round me yesterday,  
a pair of loons swam in the bay.  
Sun glistened on a shiny trail,  
the voyage of a tiny snail.  
Another day a sand hill crane  
squawked raucously, claimed his domain.  
A dragonfly once came to me,  
she landed lightly on my knee  
and lingered, thoughtful, for a spell  
till I was done, then bade farewell  
and soared away on gossamer wings  
to do important dragonfly things.  
Such wonders I would never see  
from the indoor facility.

by Anne Hofland

# IN MEMORIUM

Kathleen “Kay” Strutt

1930-2022

It is with great sadness that we announce the passing of Kathleen “Kay” Strutt on May 23rd, 2022 peacefully at Health Sciences North after a long joyful life and courageous battle with cancer. Beloved wife and companion for over 58 years to Harold (2008).

Kay will be greatly missed by her children Kim Taylor (Dan), Debra (Rob), John (Helen), Jamie (Kathy) and her cherished grandchildren Darryl (Natalie), Allison (Steven), Samantha (Warren), Wilson, Kristin (deceased) and Jose.

She was an adored G.G. to Drake, Paige, Tyson, Xavier, Paloma, Odin, West, Lennox and Orion.

Kay had a special bond with her sister Evelyn Kilroy as well as many cousins, nieces, nephews and friends.

Kay worked for Ontario Hydro before devoting her life to raising her children and supporting her husband. Harold and Kay raised their family in Garson then they spent the first 26 years of their retirement enjoying Trout Lake and Florida. Kays' gift of friendship and hospitality were put to good use in both locations. There was always a meal on the table and a bed to sleep in if you dropped by.

Kay lived at Westmount Retirement Home for the last 8 years. She made many new friendships with fellow residents and staff.

She will be remembered for her quiet determination, selflessness and her friendship to everyone. And, of course, her famous chocolate cake!

Kay and Harold were pioneers on Trout Lake. They enjoyed summers in their original camp, which is now the sleep camp, with 4 children, and often entertained other families. Kay stayed for weeks at a time with the children while Harold travelled to Sudbury to work and she only had a wood stove and an ice box to provide for everyone.

Kay was lucky enough to share and make memories with four generations of her family at what was often referred to as the Crooked Hat Base. Watching her children, grandchildren as well as great grandchildren catch their first rock bass, learn to dive off the dock and successfully swim across the lake were some of her favourite moments.

When you have your next “Tippy Time” or see the sun setting at Trout Lake please raise your glass to Kay and know that she would be delighted to know we are all still enjoying what she thought was one of the greatest places in Northern Ontario.

When you have your next “Tippy Time” please raise your glass to Kay!

## Charles (Charlie) Lumbis

1952-2022 (69 years)

The family is saddened to announce the death of Charlie Lumbis, after a brief battle with ALS.

Charles was the son of Gertrude & Vytautas (Peter) Lumbis, predeceased, and younger brother to Victor, predeceased.

He was a loving partner to Linda Lachance, a wonderful father to Hope (Steve Preussner), and doting grandfather to Mayson.

Charlie worked as an exploration geologist in northern Ontario, working at remote bush camp sites as diverse as Baffin Island, and Daniel's Harbour, Newfoundland and at Lac Minerals head office in Toronto. He was known as an ardent fisherman, hunter, and outdoorsman. He was considered a fishing expert on Lake Wahnapiatae and Trout Lake and was sought out for advice on where and how to catch the big ones. He and Linda built their dream home on Trout Lake, their favourite place where they met. His family had a camp on the lake since he was six years old.

Notorious for his love of speed, he was a motorcyclist since he was 16, terrorizing people on Cherriman Road, and spent time touring around United States with the Venture Riders. He also loved fast boats and was always after the elusive 100 mph with his Hydrostream AE21. He was a connoisseur of good beer, so when you think of Charlie, raise a glass for him.

His wonderful eye for photography, and sense of humour will be missed by those whom he shared his posts with on Facebook. He never missed a beautiful sunset. He's gone fishing now, looking for the next big one.
